

BeanRunner Cafe

Website Analysis & Redesign Strategy

beanrunnercafe.com · Peekskill, NY

Prepared June 2026

This report provides a complete audit of the current BeanRunner Cafe website — covering site architecture, page-by-page layout, UX/design issues, and SEO gaps — followed by a prioritized set of redesign recommendations and a proposed new information architecture.

1. Site Overview

Attribute	Current State
Platform	Wix.com (drag-and-drop builder)
Copyright year	2021 (outdated)
Pages	8 pages (Home, About, Menu, Music/Events, Art Gallery, Past Exhibits, Contact, Menus)
Navigation items	8 top-level + 1 sub-item (Past Exhibits)
Mobile responsive	Yes (Wix default)
Analytics / tracking	Google Site Verification present; no visible GA4
Social media	Facebook only (no Instagram, no YouTube)
Online ordering	None
Reservations	Email-based only (beanman.beanrunnercafe@gmail.com)
SEO meta desc.	Generic, keyword-stuffed, no USP

2. Page-by-Page Breakdown

Home

- Hero area: collage of 4–5 small product/interior photos, no full-width hero image.
- Tagline: 'Good food, Fine wine, Great Music' — small, low-hierarchy text.
- Hours of Operation displayed as a static JPEG image (not readable by screen readers or search engines).
- No clear call-to-action (no 'View Menu', 'Reserve a Table', or 'See Events' button).
- Duplicate navigation block at the bottom (footer nav mirrors top nav).
- No hero video, no mood-setting imagery that communicates the live music/cafe brand.

About

- Strong narrative content — origin story of Ted Bitter and Drew Claxton, building history (c. 1850).
- Two small interior photos and two larger photos with no captions.
- Text is a single block with minimal visual hierarchy; no pull quotes or callouts.
- Page title 'about | beanrunnercafe' is lowercase and unprofessional.
- No staff bios, owner photos, or social proof (press mentions, awards).

Menu (Online Menu)

- Powered by Wix Restaurants (interactive menu widget).
- Categories: Breakfast, Weekend Brunch, Salads, Sandwiches/Pizza/Soups, Verifiably Veggie, Smoothies, Kids, Desserts, Coffee/Tea, Wine & Beer, Espresso Bar.
- Item descriptions are good; photos exist for most items but are very small (blurred thumbnails).
- Pricing typo: Mixed Fruit Splash listed as '\$790' instead of '\$7.90'.
- Some items labeled 'My New Option' (internal Wix label leaked to public).
- No allergen or dietary filter; vegan items scattered instead of consolidated.
- No online ordering or add-to-cart functionality.

Music / Events

- Slideshow of 6 music/performance photos (small, low-res thumbnails in text).
- Good written copy about Fri/Sat live music schedule.
- Calendar of Upcoming Events: widget appears empty or client-side rendered — no visible events in page text.
- Reservations handled via email only; no booking widget (OpenTable, Resy, etc.).
- No artist profiles, set times, ticket prices, or past performance archive.

Art Gallery

- Single page with one current exhibit promo image (Winzig, Mar 2026).
- No artist statement, opening/closing dates, or event info.
- No image gallery grid; just one static JPG.
- Past Exhibits is a sub-page but content is unknown (likely similar minimal layout).

Contact

- Address, email, phone listed cleanly.
- A Wix contact form is present but visually minimal.
- No embedded Google Map.
- No hours of operation on this page (they're only on the Home page as an image).
- No parking info or transit directions.

Menus (duplicate page)

- A second 'Menus' link exists in the top navigation alongside 'menu' — both appear to go to menu-related content.
- This creates user confusion and duplicates navigation real estate.

- Should be consolidated into a single 'Menu' page.

3. UX & Design Issues

Severity	Issue	Detail
CRITICAL	No clear CTA on homepage	A first-time visitor has no obvious next step. There is no 'Reserve a Table', 'View Menu', or 'See This Week's Shows' button above the fold.
CRITICAL	Hours displayed as JPEG image	Hours of operation are an image file. They cannot be indexed by Google, read by screen readers, or updated without re-uploading an image. A pricing/hours change requires graphic design work.
CRITICAL	Duplicate & inconsistent navigation	The nav bar contains both 'menu' and 'Menus' as separate items (different capitalization). This is confusing and wastes nav space. One item links to the Wix Restaurants widget, the other purpose is unclear.
HIGH	No booking/reservation widget	The venue fills quickly (per their own copy) but takes reservations only by email, 48 hours in advance. A simple embedded widget (OpenTable, Resy, or even a Calendly-style form) would reduce friction significantly.
HIGH	Visual identity is weak	No full-width photography, no consistent color palette, no typographic system. The site uses default Wix fonts and layout. The brand story (historic 1850s building, community jazz venue) is completely absent from the visual design.
HIGH	Menu pricing error	Mixed Fruit Splash is listed as \$790 — almost certainly a data entry error (\$7.90). Live on the public menu.
HIGH	Internal labels exposed	Multiple menu items have options labeled 'My New Option' — this is an internal Wix Restaurants placeholder that was never renamed before publishing.
MEDIUM	Social media is only Facebook	A live music cafe with rotating art exhibits is inherently visual. Instagram and YouTube/Reels are the natural channels for this type of venue. No links to either.
MEDIUM	Art Gallery is a single image	A rotating gallery program is a major community differentiator, but the page shows only one static promotional image. No grid, no dates, no artist info.

MEDIUM	SEO meta descriptions are generic	The homepage meta description is 'restaurant, cafe, live music, Bean Runner Cafe, breakfast, weekend brunch, smoothies, beanrunnercafe.online' — a keyword dump with no sentence structure, not compelling in search results.
LOW	Copyright year is 2021	Footer still reads '© 2021 by BeanRunner Cafe' which signals to visitors the site is outdated or unmaintained.
LOW	Log In button in header	A 'Log In' button is visible in the top nav — likely a Wix member login artifact with no user-facing purpose. It adds clutter and confusion.

4. Redesign Recommendations

Visual Identity & Brand System

- Define a color palette rooted in the cafe's warmth: deep espresso (#2C1810), warm amber (#C8963E), cream (#F5F0E8), and charcoal (#1A1A1A).
- Select two typefaces — a bold serif for headings (e.g., Playfair Display) and a clean sans-serif for body (e.g., Inter or Lato).
- Commission or curate a set of high-quality photos: interior ambience, live performances, food/coffee close-ups, and the historic building exterior.
- Remove the Wix 'Log In' button from public navigation.

Homepage Redesign

- Full-width hero section with a dramatic interior/performance photo, the tagline, and two CTAs: 'Reserve a Table' and 'View This Week's Shows'.
- Three-column highlight strip below hero: FOOD · MUSIC · ART — each linking to the relevant page.
- Upcoming Events widget (auto-pulls from calendar, shows next 2–3 events).
- Replace Hours-of-Operation JPEG with styled HTML text block (editable, SEO-friendly, accessible).
- Testimonials or press quotes section.
- Instagram feed strip at the bottom (social proof + visual richness).

Navigation Simplification

- Consolidate 'menu' and 'Menus' into a single 'Menu' nav item.
- Move 'Past Exhibits' out of the nav entirely — link from within the Art Gallery page.
- Final nav: Home · About · Menu · Music & Events · Art Gallery · Reserve / Contact

Menu Page

- Fix the \$790 pricing error immediately.
- Rename all 'My New Option' labels with proper modifier names.
- Add dietary filter tabs (All, Vegetarian, Vegan, Gluten-Free).
- Surface a 'Weekend Brunch Special' callout visually — it's a key revenue driver.
- Consider a PDF download option for the full menu.

Music & Events Page

- Integrate a real event calendar widget (Google Calendar embed or Eventbrite).
- Add a recurring weekly schedule card: Fri 7pm (Salsa/Reggae/R&B;) · Sat 6pm (Jazz).
- Embed a direct reservation form (even a Typeform or Google Form is better than email-only).

- Add a short gallery or video clip from past performances to build excitement.

Art Gallery Page

- Display current exhibit as a featured card with artist name, dates, and a short statement.
- Add a 3–4 image preview grid of the exhibit.
- Link prominently to 'Past Exhibits' with a grid of past show thumbnails.
- Include a 'Submit Your Work' or 'Inquire About Exhibiting' CTA for artists.

Contact Page

- Embed a Google Map with the location pinned.
- Add hours of operation as formatted text.
- Include parking/transit notes.
- Make the contact form more prominent with clear field labels.

SEO & Technical

- Rewrite all meta descriptions as compelling sentence-form copy with a clear USP.
- Update copyright year to 2026.
- Add structured data (Schema.org LocalBusiness, Restaurant, Event) for rich search results.
- Ensure all image alt tags describe the content meaningfully.
- Add Instagram and YouTube links to footer and contact page.

5. Proposed Information Architecture

The following restructured site map consolidates duplicate pages and elevates the venue's three pillars — Food, Music, and Art — as equal navigation anchors.

Page	Key Sections / Content	Primary CTA
Home	Hero + tagline · Feature strip (Food/Music/Art) · Upcoming events · Hours · Instagram feed	Reserve a Table
About	Origin story · Owner profiles · Building history · Press/awards · Community mission	Visit Us
Menu	Breakfast · Brunch · Salads · Sandwiches · Veggie · Smoothies · Kids · Desserts · Drinks · Filters: Vegan / GF / Vegetarian	View Full Menu PDF
Music & Events	Weekly schedule · Event calendar · Reservation form · Photo/video gallery	Reserve for Show
Art Gallery	Current exhibit (featured card + image grid) · Past Exhibits archive · Submit work CTA	View Current Exhibit
Contact	Address + Google Map · Hours · Phone/Email · Contact form · Parking/transit info	Get Directions

6. Priority Roadmap

Phase	Actions	Effort
Phase 1 Immediate (Week 1–2)	Fix \$790 menu price · Rename 'My New Option' labels · Update copyright year · Remove Log In button · Consolidate	Low
Phase 2 Short-term (Month 1)	Rewrite all meta descriptions · Redesign homepage with hero image + CTAs · Add Google Map to Contact · Add	Medium
Phase 3 Medium-term (Month 2–3)	Full visual rebrand (colors, typography, photography) · Rebuild homepage · Add dietary filters to menu · Revamp	High
Phase 4 Long-term (Month 3+)	Integrate live booking widget (OpenTable/Resy) · Add Google Calendar event feed · Add Schema.org structured	High
